## *From «Grandpa George», with diligence and love*

"Grandpa George", with diligence and love cultivated his orchards, producing quality products in the sunny and fertile land of the Lilantio Field of Evia.

All our products are closely linked to our tradition, our manners and customs and are an integral part of our cultural heritage. That is why we, in E. & D. Kontos SA. , we feel the obligation to preserve them and pass them on to the next generations.

The grandfather George, hence the "from the grandfather's orchard" with diligence and love cultivated his orchards producing quality products in the sunny and fertile land of the Lilanti field of Evia. With the same criteria, his children and grandchildren continue this tradition, creating exquisite, delicious products reminiscent of another era. Preserving fruits and vegetables with sugar and processing them into jams is a great way to use them.

For the creation of our authentic recipes, only fresh fruits are used and during the production process all the rules of hygiene and safety are observed according to the ISO 22000 Standard. Thus, the excellent quality of the jams of E. & D. KONTOS SA is kept unchanged.
